L24 ANSWER 6 OF 213 CAPLUS COPYRIGHT 2005 ACS on STN
TI A programmable temperature control module for regulation of temperature in
enzymic degradation, labeling, and amplification of nucleic acids

in any nucleic acid assay where the presence or absence of a nucleic acid of interest is being assessed. The reference standard is stable and provides a control for assessing whether the nucleic acid assay was performed properly. The invention further relates to methods and kits for using and producing the nucleic acid reference stds.
